ARCHITECT

M O N I S H R E E .R

"Whatever the mind of man can conceive and believe, it can achieve".
—Napoleon Hill

A B O U T

I am a committed and hardworking Landscape Architect with a Master's degree in Landscape Architecture, where my studies strengthened my interest in ecology and sustainable environmental design. Early experiences gardening with my family nurtured a lasting connection with nature and inspired my career path. I am drawn to seaside and hillside landscapes and value outdoor experiences that influence my design approach. I believe landscapes should respond to architectural, social, and environmental contexts. My work focuses on creating ecologically responsive, socially inclusive landscapes that enhance environmental balance and human engagement.

Sketchup

RESEARCH PROJECTS

DISSERTATION Dec-Apr 2020

-Energy efficeiency techniques in hospital

In this study paper i presented what are the techniques used in bulding industy to achieve energy efficiency that includes passive and active techniques.

-Multispeciality Hospital @ Chennai

The objective of this project is to design a government proposal announced by the Honourable Chief Minister of Tamil Nadu for a 500-bed multi-specialty hospital on the campus of King's Institute in Guindy.I incorporated my research topic into this design.

-Ecological insight July 2024

The project studies how environmental factors drive tree disease spread and its impact on forest ecosystems.

-Reviving the Brine land @Hinglaj July 2025

This project explores the restoration of abandoned saline shrimp landscapes through halophyte-based regeneration and integrated aquaculture systems. The research addresses soil degradation, invasive species spread, and loss of productivity caused by intensive aquaculture. It proposes scalable landscape strategies for rehabilitating coastal brine lands.
