---

## AREA OF INTEREST

Architecture, Urban Design, Project Management, Street design, Public space – Placemaking, Tactical Urbanism, Research Projects

---

## PRIME ACADEMIC PROJECTS

- 1. Design of Hospital :** Under the guidance of Ar. Mohd. Nauman sir, I worked on the project of designing a hospital. The site was selected on the Jaipur-Ajmer Expressway and a thorough site study was performed which helped in the design process from scratch till the finish level. Ar. Mohd. Nauman had been a very great guide who helped me in every difficult step of the way.
- 2. Designing a Residential unit:** My parents own a plot of land in my home town of Pilani. There they assigned me to design and develop a proper house on that piece of land. Hence in my summer vacations I decided to work upon it, so I studied the site and designed accordingly from the plinth level till the finish surfaces.
- 3. Understanding the City Studio (CEPT:FP – Foundation Studio):** Understanding the city through spatial analysis and interpretation in terms of historical evolution, connectivity, land development, FSI regulations, publicness, infrastructure, job, housing and transport sector
- 4. Elements of Urban Design (Sem 2: Studio Project – Master’s in Urban Design, CEPT University):** Understanding the city of Ahmedabad at the ward level and developing design interventions that can impact the ward. And, have a sense of replication. Thus, I designed a safe and inclusive public open space under the Rajivnagar metro station in the Vasna ward, to meet the needs of locals and create an idea of efficient land utilization to enhance the liveability of the ward.

---

## CONFERENCES ATTENDED

- Delegate on waste management conference
- Attended online webinar on design & analysis of natural ventilation system
