

# CV

Hello !

I am a Bachelor of Construction Technology student, from CEPT University Ahmedabad. This portfolio stands as not only compilation of my work but also as translation of my inclinations , working method and thought process. As an engineer I feel that the most important thing is having a skill of solving problems that come in the field and have a practical approach to the problems. I have been visiting various sites and have been learning various construction activities, labour productivities and also have a keen interest in studying how the projects are managed. I believe that my dreams will come true if I put all my heart in my work. May I be seen through.
